

The FaxCore Appliance

A 1U Rack-mount PC that comes with the OS, the fax modems/drivers and FaxCore Evolution eV5 Software Preinstalled!

Plug and Play was never Easier !

Cost effective Appliance

Ready to Deploy

FaxCore is an embedded appliance designed to fax enable your environment. The appliance is shipped fully configured and ready to deploy.

Telephone Interfaces

The Appliance offers support for up to 8 analog fax lines or up to 24 ports with FaxCore's T.38 FoIP drivers or etherFAX

Secure Internet Transport

The FaxCore T.38 FoIP Driver version can integrate with certified phone systems and media gateways for a converged IP/FoIP solution.

Unlimited Users and Flexible Licensing

FaxCore uses a server based pricing model to simplify licensing that includes unlimited user accounts and system profiles. Administrators can create system domains to help organize logical business groups. Child level domains can be added to setup FaxCore as a mirror image of Active Directory.

Integrated Security Providers

FaxCore includes integrations with Microsoft Active Directory, Lotus Notes, and other standard LDAP providers. FaxCore can automatically create new accounts when users first logon to help with large scale deployments.

Powerful Document Rendering

FaxCore converts standard documents into fax ready formats on the server — no 3rd party application software is required. Over 200 File formats supported including: TIFF, GIF, JPEG, PDF, DOC, XLS, PPT, PCL, PS, HTML, XML, XSL, and TXT. FaxCore also includes a client-side print driver to render a printable file from the user's desktop or installed application. The print driver is Citrix and Terminal Server compatible and can be used privately or over the internet.

Support for all versions of Microsoft Exchange, including Office 365

Easy Outlook Integration

FaxCore is designed to work seamlessly with Exchange and Outlook. No software required on the Exchange server or Outlook client. Send fax messages just like sending an email and receive faxes in email. Users can access the FaxCore web UI from within Outlook.

FaxCore User Interface

FaxCore's web client works over any private or public network. Multiple browsers are supported: IE, Fire-Fox, Google Chrome and Safari. The web client does not require any ActiveX or Java components and resembles the Outlook Web Access (OWA) interface.

Web Services SDK and API Included

Facilitates easy integration with 3rd party applications.

The FaxCore Appliance Selection

Products Designed to Meet Your Needs

Appliance Specifications

- Celeron n2807 1.58 ghz CPU
- 8 GB RAM
- Gigabit Ethernet Port
- 500 GB Solid State Drive (SSD)
